Domain Systems Announces Successful Go-Live at ADC

Merging ADC/LGC Wireless, Implementing PG&C and Domain's SAP Integration

Salt Lake City, UT – December 4, 2008 - Domain Systems, Inc, Oracle's Leading Agile PLM Systems Integrator and Reseller, announced the successful completion of a major data merger and upgrade between ADC and LGC Wireless, implementation of PG&C and Domain's SAP integration to Agile PLM.

Domain consultants and integration specialists successfully took LGC Wireless from Agile Advantage to 9.2.2.4 and ADC from Agile version 8 to 9.2.2.4, then merged the two together. Domain was then able to implement Agile Product Governance and Compliance (PG&C) and Domain SAP Integration.

"This is probably the first time anyone has undertaken upgrading from Agile Advantage, Agile's old SME solution, to Agile Enterprise PLM along with a data merger with another Agile Instance all at the same time" said David Bartlett, Vice President of Domain's Professional Services Group.

Domain also replaced ADC's limited legacy SAP to Agile ERP solution with Domain's popular Agile to SAP Exchange Infrastructure (NetWeaver) adapter. Domain's integration is unparalleled in the industry and reflects years of experience working with hundreds of Agile clients.

"Domain continues to stand out as the leading Partner for Oracle's Agile PLM. We provide what no other Oracle Agile Systems Integrator can offer. Some Partners can provide Agile Advantage expertise while some provide only Agile 9 expertise, but with our PG&C experience and a tried and true SAP integration on top of both of those at a price customers can afford, Domain is simply unparalleled." Randy Pettit, President, Domain Systems, Inc.

About Domain Systems, Inc.

Founded in 1996, Domain Systems, Inc. is an information technology systems integrator, software developer and engineering consulting organization. Domain provides leading edge consulting, implementation, integration, customization, deployment and support of enterprise content management (ECM), collaborative manufacturing commerce (CMC), product lifecycle management (PLM), Supply Chain Management (SCM) and document/content management (DM) systems.
