

## CORPORATE DATA SHEET

### About Domain Systems

Founded in 1996, Domain Systems, Inc. is a privately held company headquartered in Salt Lake City, Utah with additional offices around the U.S..

An information technology and engineering consulting organization, Domain Systems offers state-of-the-art consulting, implementation, integration, customization, deployment and support of enterprise content management (ECM), product lifecycle management (PLM), and Engineering Innovation Systems.

Domain Systems empowers business with ability; providing rapid time-to-value strategies and technologies that help clients drive business performance, manage mission critical content including revisioning, repurposing and audit trails – all while increasing security and reducing errors.

From our extensive industry knowledge, Domain Systems value-add includes more than 200 years of combined business process knowledge, industry expertise and technical know-how.

Domain Systems has demonstrated our ability to help companies efficiently manage all types of content and, for regulated industries, provide compliance.
