PRESS RELEASE

For Immediate Release

Salt Lake City, UT (July 21, 2009) – Domain celebrates 13 years of delivering value through products and services to Agile PLM Customers

Domain Systems, Inc, Oracle's Agile PLM Systems Integrator and Reseller today proudly announces their 13th year of delivering value through quality products and services to Agile PLM Customers.

Since 1996, Domain has helped bring value to over 300 Agile Customers across all releases and all industries large and small by providing Oracle Agile PLM services including: implementations, upgrades, and data migrations. In addition, with nearly 20 ERP, ECAD Agile integrations and utilities to augment and extend the value of Oracle's Agile PLM to their customers, Domain continues to be one of the most successful, reliable and most experienced system integrators Oracle has for Agile PLM.

"It's an honor to be celebrating 13 years as an Agile PLM Partner. We have worked with so many Customers through the years and it shows that our continued focus on providing tangible value, coupled with our deep domain expertise around the Oracle Agile PLM platform, is the reason why they have remained loyal. We are the best not because we're the oldest; we're the oldest because we're the best." Randy Pettit, Domain Systems Founder and President. "We have always worked closely with all levels of project management and technical personnel, from the executives to end users. As a result, our customers are aware of the important role everyone plays in a project and continually work towards an end that satisfies the requirements, on time and within budget. It is this level of attention to detail that has also added to our tested and true formula for success."

In an economic time ripe with its own challenges, Domain continues to help their Customers stretch incremental value from their enterprises through upgrades and evaluation of their existing Agile Environments. Domain consulting services has often found ways to dramatically impact Customer revenue, cost and quality equations. The best testament is Domain's Oracle Accelerate solution, a rapid, defined and proven best practices and methodologies around implementation and upgrades. Domain, also a pioneer of line item services in many of its Agile offerings allowed Customers to know what they get quickly and reliably. With pride in educating all parties along the way, much success comes through delivering "Quality Service" and "Value Engineering". Each job is carried out with value and quality in mind.

"As we celebrate our 13th year in business, it is also important that we honor those individuals that helped us reach this point, the professional staff as well as our excellent customers we work with here at Domain Systems," says Pettit.
