

Strategic Value Outsourcing

With today's demands of accomplishing more with less - multiplying business leader's responsibilities and dividing their attention - the inability to obtain qualified resources often results in missed deadlines, cost overruns, or poor quality deliverables. We assist companies obtain the resources they need through outsourcing IT professionals. Companies like Intel, CSC, Cisco and the FDA have each improved technical capacity while reducing human resource costs using Domain Systems.

Maximize Your Capital

The effective use of financial, technological or human capital separates those who prosper from the rest. In our world of knowledge-based economies where revenue driving technologies are moving faster than business leaders can assimilate. Qualified human capital has emerged as the most challenging to secure and yet the most critical to corporate success. Quality, cost effective human capital drives improvement of technology and financial capital.

Your IT Business Strategy to the Future

Outsourcing has become a strategic business tool. Business functions that do not directly create value for customers or shareholders - those that do not differentiate - can be appropriately outsourced.

Strategic outsourcing may include:

- A major systems upgrade is necessary
- Short-term technical requirement or project is planned
- Restructuring or spin-off without sufficient IT infrastructure
- A merger or acquisition which resulted in a technology or process incompatibility
- Needed technical training or ramp-up that can not be accomplished within the project deadlines
- Teams lack expertise, resources, or technologies necessary to fulfill their role
- Resources focused on support activities that are not bringing value to customers or shareholders.
- Technology resources are not keeping up with demands

Domain Systems provides industry proven professionals for successful results!
