

Link-to-Glovia Application Adaptor for Agile Users

Domain Systems' Link-to-Glovia Application Adaptor is designed for companies who require integration of Agile PLM to their Glovia™ ERP system. Our Link-to-Glovia adaptor transfers Item Master, Bill of Material and AML information from Agile to Glovia without the need for user intervention.

Benefits

- Saves money by reducing need for duplicate input
- Leverages existing IT investments
 - Provides timely, business-critical information
 - Accurate data exchange with instant error notification
 - Easily configurable and customizable
 - Reliable and easy to use

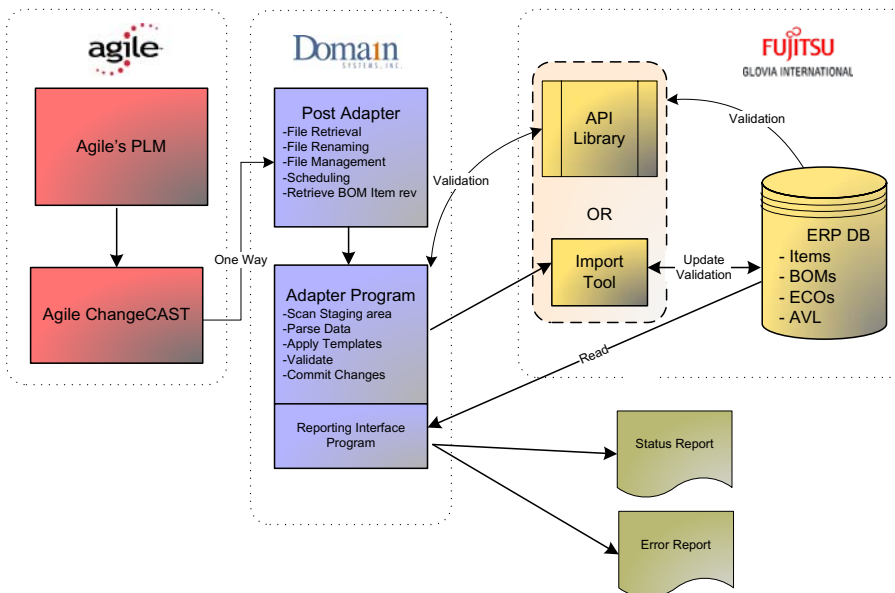

Systems Requirements

Supports:

- Agile version 6.0 & higher (Advantage & 9.x)
- Glovia.e™ Version 5.1 and higher

About Domain Systems

Domain Systems is an information technology consulting organization, software developer and systems integrator. Headquartered in Salt Lake City, Utah with offices around the U.S., Domain Systems provides comprehensive product and service solutions to hundreds of customers across the U.S., Canada and Europe.

Functional Overview

The interface reads an ASCII file generated by Agile's ChangeCast whenever a change order is released. The Link-to-Glovia Adapter analyzes the ASCII file, performs an error check, then populates the Glovia database. File transfers are performed via FTP (TCP/IP).

The interface is scheduled to execute at specified intervals based upon your requirements. It looks for input files at specified locations. Upon finding data files, it loads the content of the data files to temporary tables and copies the input files to a backup location. The loaded content is validated against Glovia tables to ensure data integrity. If the data is found to be free of errors, Glovia tables are updated and the data is deleted from the temporary table. If the data is found to have errors or warnings an e-mail is sent to specified users with an attached error log file.

Base Product Package

Link-to-Glovia includes:

- On site installation
- Training & Documentation
- Add-on modules may include ECO/MCO customizations

Available exclusively from Domain Systems
