

# Link to Peoplesoft Application Adaptor for Agile Users

Domain Systems' Link-to-PeopleSoft Application Adaptor is designed for companies who require integration of Agile® PLM to their Oracle/PeopleSoft® ERP system.

Our Link-to-PeopleSoft adaptor is bi-directional. It transfers ECO/MCO, Item Master, Bill of Material and AML information from Agile to PeopleSoft and extracts the cost data of parts within PeopleSoft and loads that information into Agile; without the need for user intervention.

## Functional Overview

### Agile-to-PeopleSoft

The interface reads an ASCII file generated by Agile's ChangeCast whenever a change order is released. The Link-to-PeopleSoft Adapter analyzes the ASCII file, performs an error check, then populates the PeopleSoft database. File transfers are performed via FTP (TCP/IP). The interface is scheduled to execute at specified intervals based upon your requirements. It loads the content of the data files to temporary tables, copies the input files to a backup location and validates against PeopleSoft tables to ensure data integrity. The PeopleSoft tables are updated. E-mail is sent to specified users in the event of an error.

### PeopleSoft-to-Agile

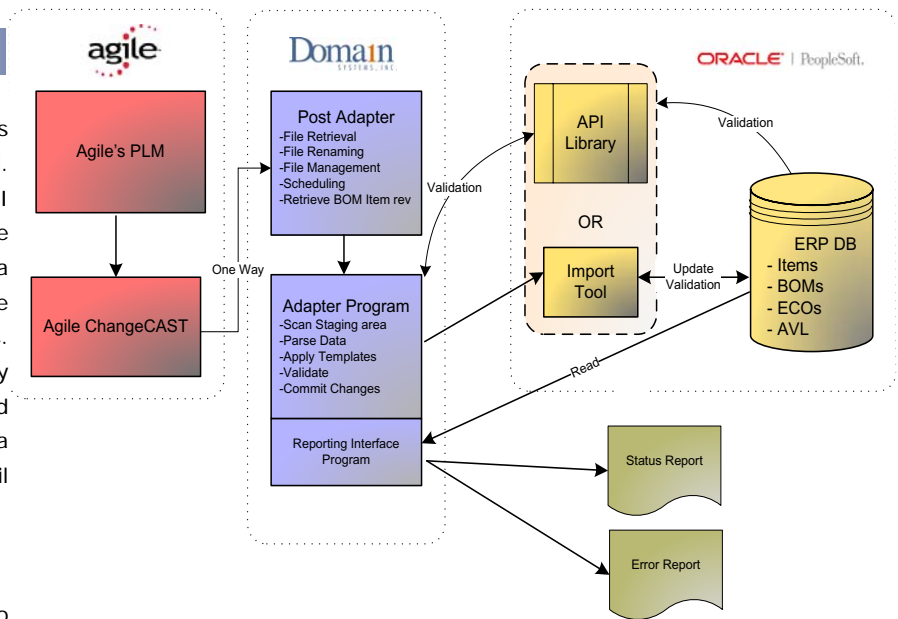

The Link-to-PeopleSoft Adapter also sends updates to cost information back to Agile

## Product Package

Link-to-PeopleSoft includes:

- Installation
- Documentation
- Training

## Systems Requirements

Supports:

- Agile Advantage or Agile versions 8.0 and higher
- PeopleSoft 7.5
