## Optimedica Chooses Domain Systems

### *Optimedica Picks Domain For Hosted Agile PLM Software and Services*

Salt Lake City, UT – December 16, 2005 - Domain Systems, Inc announces the closure of its latest deal with Optimedica. Agile's PLM application will be critical to delivering product to market in a timely manner, Optimedica also recognizes that Agile Advantage 2005 PLM was the right solution now and in the future. As such they will begin using Agile Advantage as a hosted solution but will be able to change at any time to a local application. For a rapidly growing company like Optimedica, Agile typically provides many more options both in functionality and scalability than other PLM competitors. Domain also provided Optimedica the comfort of reliability that comes with a company like Domain Systems who has a proven track record of delivering what they sell.

"Medical device manufacturers must deal with the same time-to-market, cost control, and quality assurance challenges that any discrete manufacturer would, however design and manufacturing issues in the Medical industry are even more complex due to the FDA's unique and stringent requirements for compliance with good manufacturing practices involving document and design control, electronic signatures, and software validation." Says Domain president Randy Pettit. "Domain and Agile are committed to providing compliance and validation solutions as part of the Agile Advantage 2005 software which offers manufacturers the processes for traceability and accountability they must have in a highly competitive product development environment." No one is better suited to provide Agile Advantage than Domain who has a long track record helping Medical Device customers large and small gain rapid time to value by implementing the best software in the shortest timeframe.
