Domain Systems Successfully Deploys Oracle's Agile PLM at Mindspeed Technologies®

FastStart Solution Key to Rapid-Time-Value

Salt Lake City, UT - May 5, 2008 - Domain Systems, Inc, Oracle's Agile PLM Systems Integrator and Reseller, announced the successful completion of Agile 9.2 implementation at Mindspeed Technologies, Inc. (NASDAQ: MSPD), a leading supplier of semiconductor solutions for network infrastructure applications.

The Implementation included a roll-out of Oracle's Agile Product Collaboration (PC), Product Quality Management (PQM) and Product Portfolio Management (PPM) solutions.

"Mindspeed selected Domain because of their breadth of Agile knowledge, impressive industry references, and responsiveness. In addition, their knowledge of our legacy system made them logical choice for selection. Post implementation support continues to be very responsive. Everything we expect in a long-term consulting arrangement," Colin Black, chief information officer, Mindspeed Technologies.

Domain implemented Mindspeed with their FastStart solution, soon to be worked into Oracle's Accelerate program. Domain's FastStart program is designed and packaged to offer industry best-practice solutions to achieve near "instant-on" and "instant-ROI" results. The combination of fixed cost solutions, staff expertise, and application bundled solutions allow for rapid configuration and deployment against a wide range of industry specific needs and functionality.

"We're pleased with the results of this program. It was our objective from day one with FastStart to offer our clients a much faster and more cost effective implementation than a standard PLM deployment.

FastStart meets the needs of Customers who desire to benefit from the value curve in a very fast and efficient manner. Domain's proven FastStart methodology, now successful with multiple Customers, incorporates years of PLM best practices and improves business process and data management efficiency, "David Bartlett, VP of Services, Domain Systems.

About Domain Systems, Inc.

Founded in 1996, Domain Systems, Inc. is an information technology systems integrator, software developer and engineering consulting organization. Domain provides leading edge consulting,

implementation, integration, customization, deployment and support of enterprise content management (ECM), collaborative manufacturing commerce (CMC), product data management (PDM), Supply Chain Management (SCM) and document/content management (DM) systems. In addition, the general Contract Services division has highly skilled personnel with various consulting, project management, programming and implementation expertise. Domain Systems is a privately held company headquartered in Salt Lake City, Utah with additional offices throughout the US. Domain Systems provides comprehensive consulting coverage across the U.S., Canada and Europe. For more information, visit the company's Web site at www.domainsi.com.

About Mindspeed Technologies

Mindspeed Technologies, Inc. designs, develops and sells semiconductor networking solutions for communications applications in enterprise, access, metropolitan and wide area networks. The company's three key product families include high-performance analog transmission and switching solutions, multi-service access products designed to support voice and data services across wire-line and wireless networks, and WAN communications solutions including T/E carrier physical-layer and link-layer devices as well as ATM/MPLS network processors. Mindspeed's products are used in a wide variety of network infrastructure equipment including voice and media gateways, high-speed routers, switches, access multiplexers, cross-connect systems, add-drop multiplexers and digital loop carrier equipment.
