

Batch File/Image Extractor

Extract Files/Images from Agile

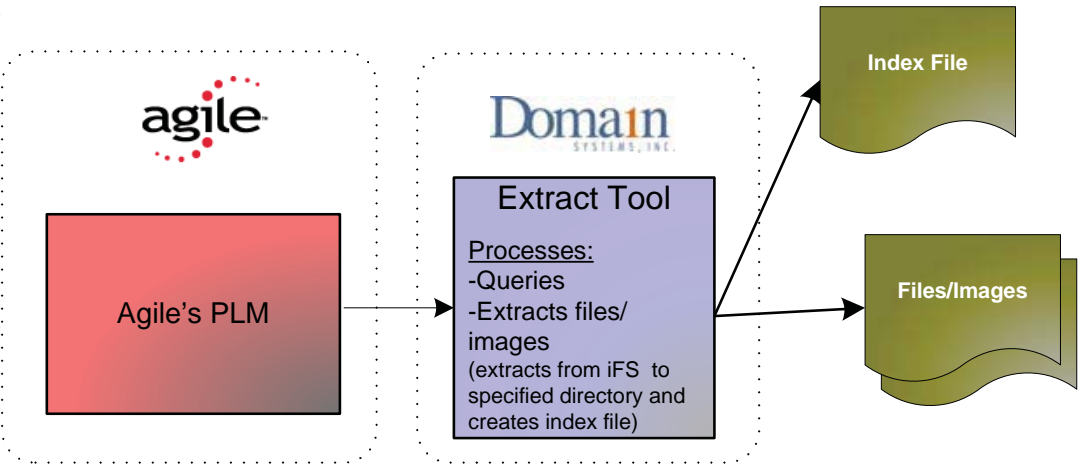

The application is an Agile, SDK/AIS program that queries the Agile database for all items with attachments and all their revisions. The output is a comma delimited file containing the item number, revision, location of the file to where it was extracted, as well as the attachment type. The index file has the following format:

Item_no, Revision, Filename, FileType

The program exports all the corresponding attachments from the Agile IFS server to a specified directory.

The output is a comma-delimited file containing the item number, revision and the fully qualified path and file name for the extracted file as well as the

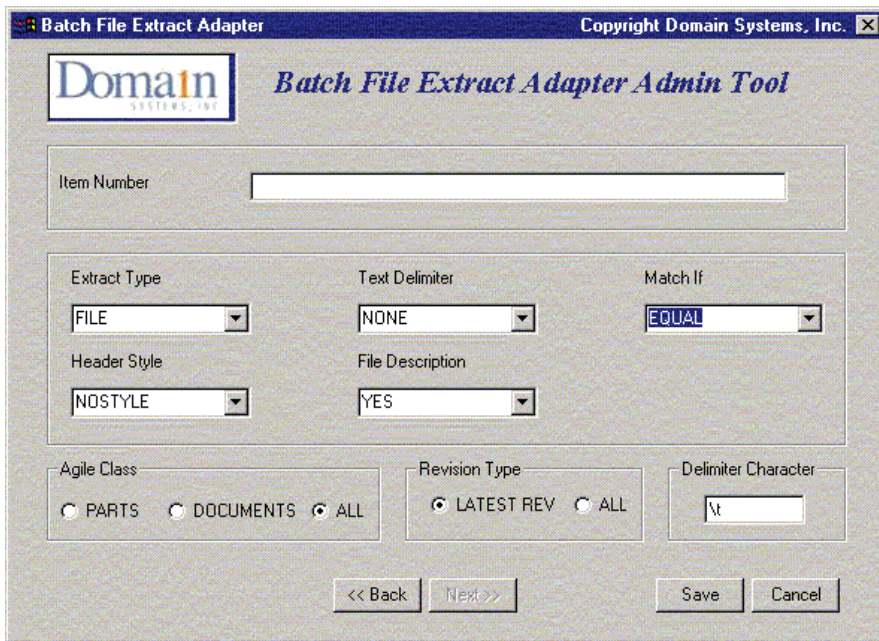

All errors are written to a log file including the total number of files extracted.

About Domain Systems

Domain Systems empowers business with ability providing rapid time-to-value strategies and technologies that help clients drive business performance, shorten new product introduction cycles, enhance supply chain collaboration, and manage mission critical content – all while reducing waste, errors and lead time. Domain Systems is laser focused at discrete and process manufacturing with a profound understanding of industry needs.

Domain Systems is an information technology consulting organization, software developer and systems integrator. Headquartered in Salt Lake City, Utah with offices around the U.S., Domain Systems provides comprehensive product and service solutions to hundreds of customers across the U.S., Canada and Europe.

attachment type. The index file has the following format:

ITEM NUMBER, REVISION, FILE NAME, FILE TYPE

10000,A, c:\file1.pdf, IMAGE
20000,B, d:\file2.doc, FILE

Available exclusively from Domain Systems
